STUDENT HEALTH MANAGEMENT

Every student's health record, always at hand.

mymeddiCAL connects your school's nurses, teachers and admin with the parents and guardians who trust you — around a single, live source of medical truth.

Everything your school needs, built in.

Medication Plans & Administration

Guardian-approved plans, scheduled doses, real-time completion logging with witness recording.

Ad-Hoc Health Events

Log medicated care, non-medicated care and watch & act incidents — with downloadable PDF reports.

Camp & Excursion Management

Tokenised guardian permission links, attendance approvals and student medical summaries for off-site trips.

Instant Guardian Notifications

Parents receive real-time push alerts the moment medication is administered or an event is logged.

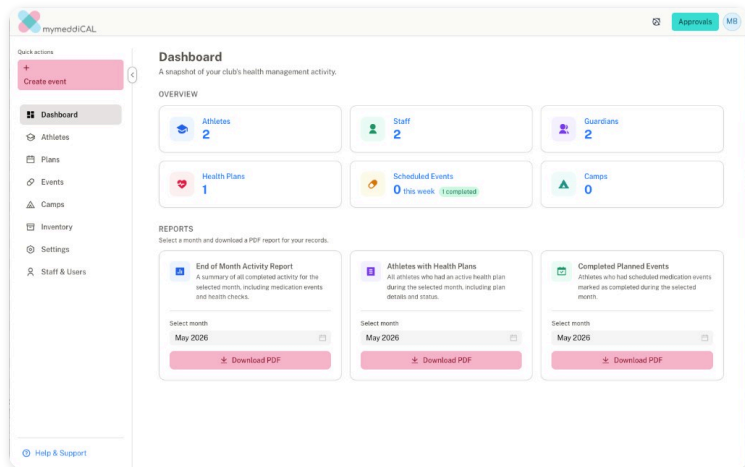

Co-Guardian Delegation

Parents can delegate access to grandparents, carers or co-parents — with a full audit trail.

Role-based access · Full audit trail · Duty-of-care ready · Web & mobile (iOS + Android)

How it works

- 1 Guardians create the health plan**
Parents add medications, emergency contacts, allergies and care instructions from the mobile app or web — no paper forms.
- 2 School reviews & approves**
Nurse or admin reviews the plan, assigns dispensing staff and sets schedules — data flows in, no re-entry needed.
- 3 Staff administer with confidence**
Teachers and nurses see confirmed plans, correct doses and clear instructions — on any device, anywhere on campus.
- 4 Parents stay in the loop**
Automatic push notifications confirm every administration in real time. No calls, no follow-up emails.

WHO USES IT

- School Nurse
- Teacher
- Front Office
- Support Staff
- Parent / Guardian
- Co-Guardian / Carer

Purpose-built for schools

0

Paper forms to log a health event
