

mymeddiCAL

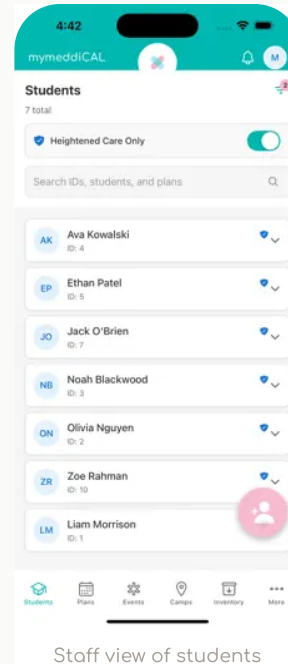

MOBILE APP — IOS & ANDROID

Your school's health records, in your pocket.

The mymeddiCAL mobile app puts medication plans, health events, student records and real-time guardian notifications in the hands of every staff member — wherever they are on campus.

mymeddiCAL.com

Staff view of students

Built for mobile-first workflows.

-  **Student & Plan Access**
View every student's active medication plans, allergies and care notes — instantly searchable.
-  **Log Medication On the Go**
Administer and confirm doses from the app — no need to return to a desk or paper log.
-  **Create Health Events Instantly**
Log medicated care, non-medicated care and watch & act incidents from anywhere on campus.
-  **Real-Time Push Notifications**
Staff receive reminders when doses are due. Parents are notified the moment care is given.

Available on the App Store (iOS) and Google Play (Android) · Free to download

What you can do in the app

For school staff

- View all students & active medication plans
- Administer & confirm doses in real time
- Log ad-hoc health events on the spot
- Access camp student lists & medical summaries
- Receive reminders when scheduled doses are due
- View inventory levels and stock alerts

For parents & guardians

- Receive instant push alerts when care is given
- Create and update medication plans from their phone
- View their child's full event history
- Delegate access to co-guardians or carers
- Approve camp attendance & excursion permissions
- Manage notification preferences

Purpose-built for schools

iOS

& Android — native apps, not a web wrapper

Live

Push alerts to parents the moment care is given

0

Extra logins — same account, web & mobile

Sync

Web and app always show the same live data

"

I administered a dose in the sick bay and the guardian had received the notification before I got back to the office.
