CAMP & EXCURSION MANAGEMENT

No more paper slips. Guardian permissions, done digitally.

mymeddiCAL replaces paper permission forms for camps and excursions with a fully digital, trackable, guardian-approved workflow — built directly into the platform your school already uses.

How camp permissions work

- 1 Create the camp & enrol students**
Set the camp name, dates, location and select students. Add regular staff or external contractors (bus drivers, instructors) to the camp roster. [Web & Mobile](#)
- 2 Send permission requests in one click**
mymeddiCAL automatically emails every enrolled student's guardian a personalised permission request with camp details and a secure response link. [Bulk or selective send](#)
- 3 Guardians approve or decline — no login required**
Each guardian receives a unique, cryptographically secure link. One tap to approve or decline attendance. No account, no password, no friction. [Token-secured · No login needed](#)
- 4 Track responses in real time**
Staff see a live dashboard of approved, declined and pending permissions per student. Re-send reminders to outstanding guardians with one click. [Live approved / pending / declined count](#)

All permissions are timestamped and stored against the student record — a complete audit trail for duty-of-care compliance.

What staff & guardians get

For school staff

- ✓ Student medical summaries — allergies, medications, emergency contacts — all in one place for camp staff
- ✓ Medication administration and event logging on camp, from any device
- ✓ Add external contractors and non-staff members to the camp roster
- ✓ Live permission dashboard — approved, pending and declined at a glance
- ✓ Re-send permission requests to outstanding guardians instantly

For parents & guardians

- ✓ Receive a secure email with full camp details before responding
- ✓ Approve or decline with one tap — no account or login required
- ✓ Receive real-time push notifications when their child's medication is administered on camp
- ✓ Know that the school has their child's up-to-date medical information on hand
- ✓ Co-guardians and carers can also receive permission requests

Student medical data travels with the camp — no printing, no manual copying, no information left behind at school.

Built for real school workflows
